

GRADES/EVALUATION OF STUDENT ACHIEVEMENT

The purpose of a system established for the reporting of the evaluation of a student's progress and mastery in given areas of his/her school curriculum is to give the student, parent/guardian and school personnel realistic direction in the guidance, development and academic growth of the student.

The highest standards of scholarship, attitude and behavior are expected from each student. Through precept and example set by the staff, the students shall assume responsibility for their learning and behavior, and thereby show the development of self-discipline.

The Superintendent or designee shall prepare administrative regulations that clearly define the scope and rationale for a uniform method of reporting students' progress.
